

Curriculum Vitae

Name:	S. Contreras López (PhD.)
First Name:	Sergio
Date of Birth:	11 January 1979
Nationality:	Spanish
Main Disciplines:	Dryland Ecohydrology, Remote Sensing, Drought Monitoring and Management, Drought innovations, Water-related Ecosystem Services
Telephone:	+34 968 209 834
Email:	s.contreras@futurewater.es
LinkedIn:	linkedin.com/in/sergio-contreras-471a5250/

Key Qualifications

BSc in Environmental Sciences (2001), M.A.St in Surface Geodynamics (2004), and PhD (2006) at the University of Almeria. Dryland ecohydrologist, and water and drought expert with more than 20 years of career as scientific-researcher (2002-2013) and senior consultant (2013-ongoing). His expertise centres around two main topics: a) ecohydrological studies and water resources assessments by combining simulation models and satellite-based technologies, and b) technical and social impact assessments of innovative solutions and drought adaptation and mitigation strategies, with a focus on water and food security. Dr. Contreras is especially interested in generating and bringing knowledge on how water stress conditions determine the interactions and feedbacks among the hydrosphere, the biosphere and the anthroposphere, from the academic arena to an applied context, targeting this expertise to guide and support decision making by specific stakeholders. Since its joining in FW at 2013 as consulting researcher, Dr. Contreras is contributing to a better understanding of drought impacts on the environment and the economy, and leads the technical development and testing of the InfoSequia operational service, i.e. a Drought Early Warning System developed by FutureWater to support the Monitoring drought status and the Seasonal Forecasting of drought impacts. InfoSequia has been currently implemented in Colombia, Spain and Africa. He was member of the Executive Board of the BRIGAID EU-H2020 BRIGAID project (2018-2021) leading the Work Package on "Drought and Innovations", and part of the core team of experts who developed and implemented the BRIGAID's Testing Innovation Framework at the European level. Other relevant achievements include the authorship of more than 100 scientific and technical contributions, and a consolidated international experience with several stays abroad at Centre for Water Research at University of Western Australia (CWR-UWA, Australia), Institute of Applied Mathematics of San Luis (IMASL-UNSL/CONICET, Argentina), and Bureau of Economic Geology (BEG, Austin-USA).

Educational Background

2003 – 2005	PhD Universidad de Almería, Facultad de Ciencias Experimentales, Universidad de Almería Thesis: Estimation of the water balance in semiarid mountainous regions. Application to Sierra de Gador (Almería, SE Spain)
2002 - 2003	MAS Earth Surface Dynamics, Faculty of Experimental Sciences, Universidad de Almería Subjects: groundwater and environment, recharge in semiarid regions.
1997 - 2001	BSc Environmental Sciences, Universidad de Almería, España.

Professional Experience

- 2013 - present Senior consulting-researcher, Expert in Remote Sensing and Drought Management. FutureWater, Cartagena, Spain.
- 2010 - 2013 Postdoctoral Researcher (Juan de la Cierva Fellow), Centro de Edafología y Biología Aplicada del Segura – Consejo Superior de Investigaciones Científicas. Murcia, Spain.
- 2009 - 2010 Postdoctoral Fellow – Visiting Scientist, Bureau of Economic Geology – The University of Texas at Austin. Texas, EEUU.
- 2007 - 2008 Postdoctoral Fellow, Instituto de Matemática Aplicada de San Luis - Universidad Nacional de San Luis & CONICET. San Luis, Argentina.
- 2006 - 2007 Hired Researcher, Estación Experimental de Zonas Áridas (Consejo Superior de Investigaciones Científicas). Almeria, Spain.
- 2002 - 2006 Predoctoral Fellow, Estación Experimental de Zonas Áridas (Consejo Superior de Investigaciones Científicas). Almeria, Spain.

Overseas Professional Experience

As non-resident: Australia, Argentina, United States, Colombia, Perú, Panama

Selection of Most Relevant Assignments and Projects

- 2022 Hydrological modelling and evaluation of recharge patterns of the Campo de Cartagena Quaternary aquifer by using satellite data. Analysis of temporal and spatial patterns in the last century (1950-2020). Client: Spanish Geological Survey - CSIC (consultancy contract)
- 2020 - 2024 InfoSequia-4CAST: Forecasting and Quantifying Risks of Crop and Water Supply Failures using Machine Learning and Remote Sensing. Client: European Space Agency (ESA) (Incubed Programme)
- 2020 - 2021 Robust Decision Making for Land Use Planning in the Panama Canal River Basin. Client: InterAmerican Development Bank.
- 2020 – 2023 G3P: Development of a Global Gravity-based Groundwater Product. Client: European Commision (RIA project, H2020 Programme)
- 2019 – 2020 Satellite-based monitoring of the health status of grasslands at the Alagón Valley (Spain). Client: Ambienta Ing.
- 2018 – 2022 Transforming Weather Water data into value-added Information services for sustainable Growth in Africa (TWIGA). Client: European Commission (RIA project, H2020 Programme).
- 2017 – 2019 HERramienta para el MANejo integral del Agua (HERMANA). Client: Funding source: Netherland Enterprise Agency (RVO) (Partners for Water project, WWSD scheme)
- 2017 Hydrogeological modelling of groundwater discharge to the Mar Menor lagoon. Client: CCRR Arco Sur–Mar Menor (consultancy contract).
- 2016 - 2020 BRIdging the GAp for Innovations in Disaster Resilience (BRIGAID). Client: European Commission (IA project, H2020 Programme).
- 2015 - 2019 IMProving PRedictions and management of hydrological Extremes (IMPREX). Client: European Commission (RIA project, H2020 Programme)
- 2014 - 2015 Accounting System for the Segura river and Transfer (ASSET). Client: Directorate-General for the Environment - European Commission.

2013 - 2016	The GEISEQ project: a toolbox for the surveillance and the efficient management of droughts. Client: Spanish Ministry of Economy and Innovation (Torres-Quevedo grant)
2010-2014	Sustainable use of irrigation water in the Mediterranean Region (SIRRIMED). Client: European Commission (Collaborative project, FP7 Programme)
2007 - 2011	Land use change in the Rio de la Plata Basin: linking biophysical and human factors to predict trends, assess impacts, and support viable land-use strategies for the future. Client: Interamerican Institute for Global Change Research (CRN programme).
2007 - 2008	Groundwater-fed woodlands in the deserts of Argentina: Understanding their vulnerability to agricultural development. Client: National Geographic Society (RG).

Selection of Technical Reports and Other Publications

SCOPUS Author ID: 18036692400; ORCID Research: <https://orcid.org/0000-0003-3991-8241>
 Google Scholar Profile, h-factor: 19 (total of cites: 1159)

Item	Total of documents
Book and book chapters	11
Scientific articles in peer-reviewed journals	25
Technical reports and Teaching documents	20
Contributions in congresses and conferences	46
